### **BTS Technologies, Inc. Reveals Future of AI Integrated Cybersecurity Defense Strategies for Small to Mid-Sized Businesses (SMB)**

#### *Leading Managed Technology Services Provider Shares How AI is Evolving SMB Defenses*

BIRMINGHAM, AL – June 24, 2021 - BTS a leading managed technology services provider (MTSP), announced today that AI (artificial intelligence) is starting to play a key role in cybersecurity defense systems for small to mid-sized businesses (SMBs). BTS protects the interests of its clients by remaining on the forefront of technology's latest advancements and it is actively advising SMBs on the potentials that AI-integration promises for cybersecurity in the very near future. Most businesses are becoming aware of how prevalent phishing attempts, identity theft and ransomware attacks have become in recent years and BTS is doing its part to help businesses put a stop to it, by sharing the technology industry's response to more sophisticated attacks.

“Whenever we talk about AI integrated into technology, the most common application that our clients are aware of is how facial recognition cameras can integrate with AI. With an appropriate data set, AI can proactively suggest a course of action based on a target’s background, prior behaviors, and other factors. This has obvious benefits for enhancing the security of any physical location,” stated Wentowski, President of BTS. “However, AI is becoming more central to every facet of cybersecurity, as well. While the applications are still growing in widespread popularity, many business owners will soon be faced

with this question: should I put my business on a ‘Smart Network’ or just on ‘a network?’”

As more businesses utilize key SaaS (software-as-a-service) apps like Slack, Office 365, GSuite and Salesforce to power their operations, the more attractive those services have become to cybercriminals. BTS is now leveraging AI to heighten defenses so that businesses can continue to work with their favorite SaaS applications, but can also rest assured that their access to those mission-critical programs remains 100% secure. AI is like adding another layer to an organization’s security stack that constantly evolves into a better version of itself.

AI is also entering the cybersecurity space as a tool for research and marketing purposes. Some AI-enabled applications can cross-analyze multiple publicly available databases to help businesses find their ideal clients’ names, email addresses, phone numbers and other relevant information in real-time. “AI is absolutely exploding, right now,” added Wentowski. “The fact that technology can learn, become smarter and more efficient, means ultimately that the businesses who harness AI now, are poised to gain significant competitive advantages in their industry. In other words, the gap between early adopters and laggards is widening.”

The main driver for AI-based technology is simple: since cybercriminals have access to more advanced technologies, they have continued to devise new methods of infiltrating networks. Since those are

built on the back of AI, the solution for SMBs who want to operate securely, must meet those strategies with equally sophisticated cyber defense tools. With the proper AI infrastructure, SMBs can not only outpace the innovation curve of cybercriminals, but they can also enhance their security across every area of the organization.

#### **ABOUT BTS TECHNOLOGIES, INC.**

BTS Technologies, Inc., (BTS) was founded on the philosophy of maintaining a profitable business by providing the best in telecommunication systems and services to our customers. The stated purpose of our company not only allows us to provide short term answers to our customer's communication needs, but also affords us a longevity unsurpassed by the telecommunication industry in our region. We strive to provide quality materials, trouble -free installations and total communication services at a fair and competitive price that will allow us to maintain our business with quality employees. This policy insures the on-going system service and support that you deserve and expect. BTS Technologies, Inc. is located at 311 West Valley Ave, Birmingham, AL 35209. For more information on BTS please call (205) 942-6532 or visit <http://www.askbts.com>.
